Our Most Sensational Sale—

Terms and Conditions—

This Price Wrecker, for the Spring of 1917, announces the greatest values we have ever placed before the bargain-buying public—greater than any of our sensational sales of the past. It brings a wide selection of the World's best products to you at tremendous money savings. Different methods of purchase and sale; original and exclusive to ourselves, enable us to wipe out all competition, so don't delay; order at once and get your share of these unheard of savings.

Quick action on your part is really necessary, for our stock of these big bargains is limited. Every offer in this book is subject to prior sale. All orders will be filled in rotation as received. First come, best served is our slogan during these great sales. We advise you to send cash in full with every order. You can safely order anything in this book without question or hesitancy. Everything we sell is backed by our well-known liberal Money Back Guarantee.

A WONDERFUL ROOFING OFFER!

**\$195 for a Roll of
Slate Coated Roofing!**

During this Sale Only!

This splendid, genuine Slate Coated Roofing is the most beautiful and durable prepared roofing made. Heavier than most roofing of this kind. Fire-resisting—will not catch fire as wood shingles do. Needs no coating of any kind. It is made of the very best roofing felts with a fine asphalt coating in which crushed slate is embedded. Furnished in two colors—red or greenish gray; never fades. Rolls contain 103 sq. ft. (sufficient to cover 100 sq. ft.)

No. 13DW204 surfaced with red crushed slate per roll.....\$1.95
No. 13DW205 surfaced with green crushed slate per roll....\$1.95

Slate Coated Individual Shingles, 8x12³/₄ in. \$4²⁵/₁₀₀

Made by the same excellent process and of the same material as the roofing above. Easier to lay than wood shingles and produce a beautiful roof. Laid on solid or regularly spaced roof sheathing in one-half less time than wood shingles. One-half less joints because they are twice as wide. No time wasted in sorting or selecting sizes. Laid 4 in. to the weather and 1/2 in. apart. A square will cover 100 sq. ft.

Per Square

No. 13DW206. Individual Red Slate Coated Shingles, per square....\$4.25

No. 13DW207. Individual Green Slate Coated Shingles, per square....\$4.25

READ EVERY WORD of this great commercial story, the world's most sensational Cream Separator Sale. It tells why P. M. Sharples, America's highest Cream Separator authority, picked Harris Brothers Co. for this great service to the people of the nation.

The First Opportunity Millions Have Hoped For !!

A Genuine Tubular "A" SHARPLES Cream Separator is NOW within your reach—at a price SO LOW and under conditions SO LIBERAL, you positively cannot refuse. So, don't put off buying YOUR separator another day. The time to act is here if you want "The World's Best."

P. M. SHARPLES Highest Cream Separator Authority in America,

President of The Sharples Separator Co., made the first Cream Separator in America. He has sold over a million Sharples Separators to the best judges of separators in the world—and always at one price—never cut before. All Sharples owners endorse the principle, quality and satisfaction, of the original genuine Tubular "A." P. M. Sharples has an enviable 35-year record—his word is as good as a government bond.

—and SHARPLES Chose HARRIS BROTHERS for the reasons in his letter below.

The Sharples Separator Co. WEST CHESTER, PA., U.S.A.

December 23, 1916

TO
HARRIS BROTHERS COMPANY
CHICAGO, ILLINOIS

Gentlemen:

In disposing of our entire remaining stock of Tubular "A" Separators to you, we do so, knowing that:

- 1st. That the Sharples Tubular "A" Separator is the best fixed-feed separator on the market—far ahead of all other fixed-feed separators in clean skimming, durability and ease of cleaning.
- 2nd. In selecting Harris Brothers Company to dispose of our entire remaining stock of Tubular "A" Separators, we do so because we believe them best equipped in every respect to quickly market these separators on exactly the same guarantee as over a million users of them have bought in the past.

We will stand back of every Sharples Tubular Separator sold by you with the same Perpetual Guarantee which has protected Sharples users in the past; and will continue to carry a complete line of repair parts.

It is thoroughly understood that this sale includes only our complete stock of fixed-feed Tubular Separators and no other.

With full confidence in your success,

Sincerely yours,

P. M. Sharples
President

For 35 Years—

SHARPLES SEPARATOR
COMPANY

Operating

The World's Largest Plant

devoted to the exclusive manufacture of Cream Separators, have enjoyed the distinction of producing the highest grade separator made—the best known separator in the civilized world—more being now in use than the total of many other kinds combined. The first Cream Separators built in America were made by P. M. Sharples, president of this Company, and the Sharples factory has been in continuous operation for thirty-five years. Keen, posted farmers and dairymen acknowledge The Sharples Separator Company as the authority in the Separator Line.

For 24 Years—

HARRIS BROTHERS
COMPANY

Owners of the:

Chicago House Wrecking Co.

have undertaken and successfully executed the greatest merchandising contracts in the history of the world. This enormous business, with a capital of \$10,000,000 and satisfied customers in every township in the United States, was founded in 1892 on a new idea—to buy and distribute nothing but bargains in the best products made. From that day to this, 24 years of honest public dealing, we have never swerved from our original plan and purpose. This has been the corner stone of our business for the past quarter century and has made our name famous from ocean to ocean.

SHARPLES Guarantee To You Forever!

With each Genuine Sharpless Tubular "A" Cream Separator purchased of Harris Bros. Co. you get our regular Guarantee Forever against defects in material or workmanship—defective parts replaced free of charge at any time. This, our unlimited guarantee, copy on request from Harris Brothers Co., given through 35 years, to over a million satisfied owners.

SHARPLES SEPARATOR CO.

Quick action on YOUR part—that's the way to get BEST results from these Great "Price Wrecking" Sales of ours. Remember the stock is LIMITED and orders are filled in rotation. While our stock of these separators would be big and sufficient, under ordinary circumstances—thousands of farmers and dairymen will QUICKLY take them ALL, when these facts become generally known.

Sharples Tubular "A" at Tremendous Price Reductions

PAGE 1

SHARPLES Tubular "A" at Tremendous Price Reductions!!

Read Why The SHARPLES Tubular "A" is The World's Best Cream Separator!

Cross Section View Showing the Simple Construction and Few Parts in the SHARPLES Tubular "A"

On this and the next few pages, we explain in plain language, easily understood by anyone, why the Sharples Tubular "A" Cream Separator is the first choice of farmers, dairymen and the best judges of cream separators everywhere.

REMEMBER THE PURPOSE for which your cream separator is intended, then consider with us one by one the features positively necessary for perfect separation.

REMEMBER, A GOOD SEPARATOR—the kind you want, must have all advantages of a low cost, proper bowl, enclosed self-oiling gears, safety and great durability; otherwise it can not be a good separator. These are the hard facts the separator buyer must look for—and it is necessary, at this time, that you bear in mind the Sharples Tubular "A" Separator has all of these vitally important features, and that no other separator, regardless of name, make or price, has them. Why? Simply because Sharples is the only separator built on correct common-sense principles, and mainly—*Sharples Patents prevent any other manufacturer from introducing these features into his machine.* Remember that!

SHARPLES TUBULAR "A" SEPARATOR is the result of 35 years' experience—the product of America's highest cream separator authority. It represents the best efforts of the most skilled inventors and most careful mechanics. Every piece and part going into their splendid construction is made of the finest material used in cream separator making.

SHARPLES TUBULAR "A" Separator as it is offered to you now is the most easily operated, durable, simple and easiest cleaned separator on the market. Fewer parts—nothing to wear out, each part individual in itself—can be replaced in a moment by anyone. There is just one bearing in the Sharples Bowl and that bearing is an indestructible ball bearing. Other makes have at least three solid bearings, which wear within a short time, causing vibration in the bowl, violating every principle of proper separation.

SHARPLES GENUINE TUBULAR "A" Separator is built to last a lifetime—thousands now in use have not cost a dollar for repairs in 15 years' service. While there are no complications whatever in the construction of the Sharples Tubular "A" separator, it is guaranteed to cut in half any record for clean skimming which any other machine is able to make.

In hot milk or cold milk, fresh milk or old milk, cow's milk or goat's milk, rich milk or poor milk, thick skimming or thin skimming, the Sharples Separators are guaranteed to skim as perfectly as to leave only one-half the amount of fat in the skim milk as any other machine in existence will leave under the same conditions.

Here are a few **FACTS** known to over a million users:

The tubular bowl of the Sharples Genuine Tubular "A" Cream Separator is found in no other separator. It is broadly patented and exclusively used in the Sharples Tubular "A." It has twice the centrifugal force of any other bowl, due to the tubular shape.

The very long, narrow shape of the tubular bowl accounts for this being the closest skimming cream separator on the market.

There is only one place to wash—no dirty labor of handling a "bucket bowl" with thirty of forty discs to clean daily as in other makes flourishing today. Always the favorite with farm women.

Every fair-minded, thinking farmer or dairymen, generally posted on cream separators, knows that the market would have been flooded years ago with cheap imitations of tubular principles had it not been for Sharples broad patents. You probably know that.

Thousands of Sharples Tubular "A" Separators now in most satisfactory use have not cost one dollar for repairs in 15 years' service. Those who understand the Sharples machine know it is built on right principles and is as near mechanically perfect as the ingenuity of the ablest cream separator authority in America can possibly make it.

Only half as many parts as other separators—each part doubly well made—rigidly inspected many times in the process of making—workmanship and materials bound to be of the highest grade.

Absolute honest ratings of capacity of every Sharples will never fool you on price per capacity, or on your skimming time, or on the cleanest skimming records per capacity in the world. Watch out for this when you buy your separator.

Greatest Opportunity of All Separator History !!

The Separator With Exclusive Features Possessed By No Other Machine Made!

Clean, Perfect Skimming Always With The Ingenious Sharples Bowl

THE BOWL OF THE SHARPLES TUBULAR "A" Separator operates, primarily, on the laws of nature. In the first place, the long, narrow shape in itself creates pressure which starts the first step of natural separation. Bear in mind at this point where the actual separation of cream and skim milk takes place. The Sharples Genuine Tubular "A" is amazingly simple. There are no discs, cones, zig-zag plates, contraptions or complications of any kind. Only three simple parts—easy to get at—easy to wash and keep spotlessly clean. Here is where all other machines are most complicated. The excuse of the makers is, that these foolish complications and contraptions are necessary for clean skimming—yet the Sharples Tubular "A" Separator leads the world today—being more effective, doing cleaner skimming and more exhaustive work than the most complicated separators.

MORE REVOLUTIONS—LESS SPEED—LESS WEAR. The process of cream separating is simple. Most everyone knows it is based entirely on centrifugal force. Therefore, the more centrifugal force in the bowl, the better. Here is where Sharples leads them all, for it increases the centrifugal force and action without increasing the speed; consequently it eliminates the wear and tear. The Sharples Bowl is light and simple, being about $2\frac{1}{2}$ inches in diameter. It goes around about twice while other bowls go around once, but as it is less than half the diameter of others, anyone can see that it travels more slowly than any other.

REMEMBER, THE LAW OF CENTRIFUGAL FORCE is, that it increases with revolutions and decreases with diameter. Don't mistake speed for revolutions. The Sharples Tubular Bowl, having twice the number of revolutions, develops four times as much centrifugal force as other bowls, and, being only half the diameter, it exerts on the milk twice the centrifugal force of any other bowl. For this reason alone it is twice as effective—the only bowl scientifically constructed to conform with the laws of nature.

All there is to the Bowl of the Sharples Tubular "A"

The illustration above tells better than words the simplicity of the Sharples Tubular "A" Bowl. Observe it contains but one tiny part—the dividing wall. The inside of the bowl is heavily tinned and easily washed.

This illustration shows you the complete spindle and enough of the bowl to show how the tubular bowls are suspended.

This illustration shows the wall of the bowl cut away at the top and bottom. Note how simple the inside of the bowl looks.

Bowl Is Suspended on Just One Indestructible Ball Bearing

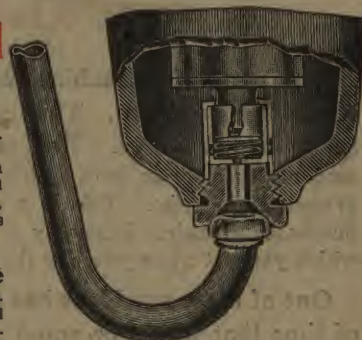

The bowl of the Sharples Tubular "A" has no fixed shaft and no fixed bearing. It is suspended by a flexible steel spindle. Its weight is borne by ball bearing, so that the bowl runs almost without friction and with smoothness, easiness and precision otherwise unequalled.

All other separators, regardless of name, make or price, have at least three bearings—some of them more. Remember, these bearings are not frictionless ball bearings but solid bearings which wear and cause endless repairs, annoyance, extra work, and always result in very unsatisfactory separating.

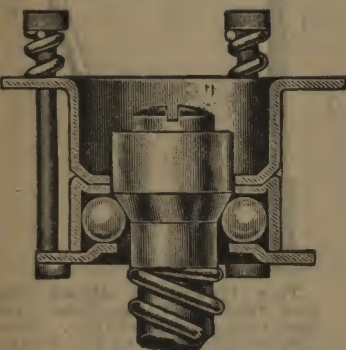

The Milk Enters the Bowl At The Bottom

WHEN THE SEPARATOR IS IN OPERATION the whole milk forces downward from the supply can through the feed tube and jets upward fountain-like into the bowl through a hole in the bottom of the bowl. Once in the bowl, the whole milk commences to whirl with the bowl. It is immediately subjected to powerful centrifugal force.

UPON ENTERING THE BOWL most of the separation takes place within a few inches of the bottom. Then on the trip upward through the tube the last small globules of fat find their place—the result is clean skimming. The skim milk is forced outward against the wall of the bowl, rises through the outlet into the skim milk pan. The cream rises upward on the inner side a little nearer to the center of the bowl and passes into the cream pan. This is the whole secret of tubular bowls. It separates cream and skim milk cleaner than any of the clumsy, hard-to-clean bucket bowls used on all other separators.

This illustration shows the lower end of the tubular bowl when the bowl is in position in the machine. Here you can see how the milk jets upward into the bowl through the feed tube.

The above illustration shows the single ball bearing spindle supporting the tubular bowl—the only bearing the tubular bowls have, and a feature found only in the Sharples Tubular "A."

More Than a Million of These Separators Now in Most Satisfactory Service!

Safe-Covered Frictionless Gears

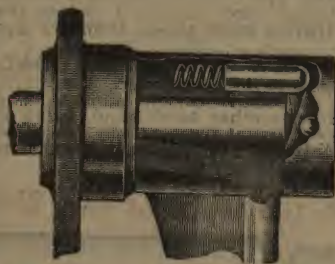

The Sharples Genuine Tubular "A" Cream Separators have all gears entirely covered. This prevents dirt and grit from getting into them. Any exposed gears are easy to catch on to clothing or fingers of the operator or those about the machine. Serious accidents are some times caused by unprotected gears. They are instantly accessible in the Sharples—no enclosed parts bolted or screwed together, or hard to get at. They are perfectly machined and fit snugly into one another. They run evenly and smoothly with the least effort. No noise or grinding of any kind, being made of the finest steel and phosphor bronze at all contact points. They are positively frictionless, eliminating all wear and assuring easy operation. Note the perfect self-oiling gears—no clogged oil holes to bother with, no dripping oil.

Perfect Self-Oiling Gears

The illustration above shows the ingenious way in which the Sharples Tubular Gears are thoroughly enclosed and made perfectly self-oiling. This oiling device saves wear, oiling, time and patience. Once or twice a week the gear case cap is lifted and a spoonful of oil poured into the gear case, as illustrated on page 5. When the gears are in motion the lower wheel dips slightly into the oil on the bottom of the gear case and throws a spray of oil over all gears as well as the ball bearing supporting the bowl. This keeps all bearing parts of the machine perfectly lubricated.

"The machine takes care of itself."

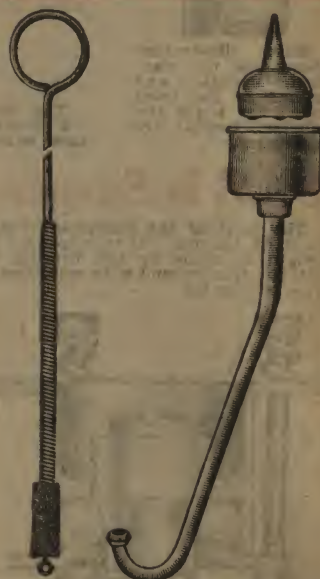

This illustration shows the ratchet, which is on that part of the driving crank that fits on the cover of the crank shaft. This ratchet is so conveniently placed that it permits the user to engage the clutch at any position of the crank when it is turned to the right. It immediately releases the crank when turned to the left or when the crank stops.

Sharples Tubular "A" Cream Separators are as near perfect in Mechanism as it is possible for man to construct them.

SHARPLES Gears Use the Same Oil Over and Over

Any parts of a machine running at high rate of speed naturally require constant lubrication. This Sharples Separator is perfectly self-lubricating as explained above. The same oil is used over and over again. This amounts to quite an item within a short time, especially with lubricating oil at the present high price. This is a point which is seldom considered until after the purchase is made. Economy of lubricating oil is just another important benefit which you get when you buy the Sharples Tubular "A" Separator.

One of these machines has been in constant steady operation for a period of time that would be equal to 100 years of service in an eight cow dairy. Six quarts of oil were used in the entire performance. Remember this point of great importance and consider carefully the other advantages of the Sharples Genuine Tubular "A" as you read these pages.

This illustration shows the feed tube, feed cup, float and feed tube cleaning brush. Note the flexible shaft of the cleaning brush, which conforms to the shape of the tube, cleaning it with one operation. The float regulates the stream of milk through the feed tube.

SHARPLES Tubular "A" at Tremendous Price Reductions!!

**Thousands Have Not Cost A Dollar
for Repairs In Fifteen Years Use!!**

Easier to Operate Than Any Other

With all important features perfectly blended into the best machine for cream separation, the Sharples Tubular "A" designers were careful to produce the easiest operating cream separators on the market. The crank axle is just at the right height for easy turning. When the machine has been started, its speed is always maintained with little effort. There is no hard back-breaking work of any kind in the operation of the Sharples Tubular "A." A single glance will show you that the crank of this separator is in the right position, just at the right height. The supply can is in the lowest position.

A **UNIQUE PLUMB LEVEL** is attached to this Sharples Tubular "A" and the operator can at all times tell at a glance whether the separator is set level or not. This is an important point, for in the satisfactory operation of a cream separator it is a great convenience to have a plumb level attached to the machine where it can be observed at all times.

THE **TIN WARE** furnished is heavier finish than can be found on other separators. The tin is extra heavy, soldering smooth and regular, the corners and edges entirely free from rough or sharp surfaces.

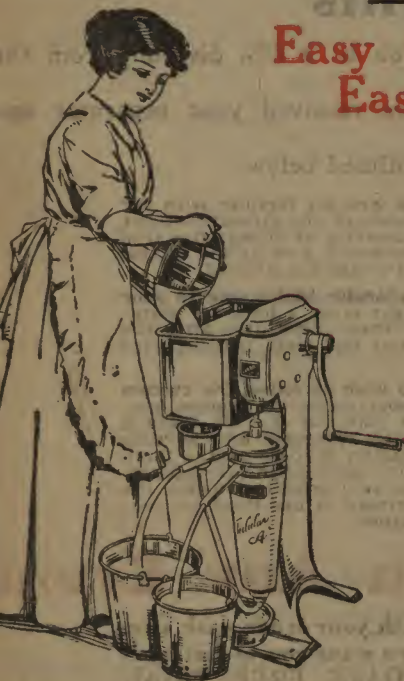

THE **FINISH** of the Sharples Tubular "A" Machines is unsurpassed by any other make. They have graceful lines and are very attractive. They may be given a place in the finest kitchen or living room. The decoration is very artistic and attractive, being the handiwork of skilled painters.

The Sharples Tubular "A" Is the
Choice of Farm Women

Reproduction of An Actual Photograph Showing the Ease of Operation Sitting Down

**Easy to Fill—No High Lifting!
Easier to Oil—Self Oiling!!
Easiest to Clean!!!**

The illustration above shows the "waist height" of the Sharples Can. No high lifting of milk or back-breaking work with the Sharples Tubular "A." The low receiving can is always preferred.

This illustration shows the operator washing the simple Sharples Tubular "A" Bowl. There are only three parts to clean. A child can quickly wash this simple bowl. No dirty discs or contraptions of any kind to contend with.

This illustration shows how easy it is to oil the Sharples Tubular "A." Simply pour a spoonful or two of oil into the gear case once or twice a week. No "hard to get at" clogged oil holes.

SHARPLES Tubular "A" at Tremendous Price Reductions!

Here are the Guarantees that Protect Buyers of the SHARPLES Tubular "A"

Regular SHARPLES Guarantee To You Forever!

With each genuine Sharples Tubular "A" Cream Separator purchased of Harris Brothers Co., you get our regular guarantee forever against defects in either material or workmanship. Any part or parts of same which may have become unfit for service because of original defects will be replaced free of charge, providing the damaged parts are returned. The term of this guarantee is unlimited and our agreement will be fulfilled at any time.

SHARPLES SEPARATOR CO.

This DOUBLE GUARANTEE Protects You **HARRIS BROTHERS CO. WITH SHARPLES SEPARATOR CO.**

For twenty-four years HARRIS BROS. CO., owners of the Chicago House Wrecking Co., has sold the world's finest products at the lowest prices. We guarantee that every Sharples Cream Separator will be up to the Sharples superior standard in every way—that it will be exactly as described in this book. If you are not entirely satisfied after you receive your Sharples, notify us and we will hand you back any amount paid us, including any transportation charges you may have paid. Our liberal guarantee is well known everywhere.

For thirty-five years the SHARPLES GUARANTEE FOREVER has proved to be the highest protection for Separator buyers in every section of the civilized world. It is the strongest and most liberal of guarantees and offers absolute protection. Thousands of farmers and dairymen, just like you, have purchased their separators under the protection of this binding guarantee. Ask any Sharples owner. This guarantee is bound to give you the satisfaction you have the right to expect.

Payments and Terms

Three Ways

First:—Cash with order which entitles you to a 3% discount from the prices on the opposite page.

Second:—Cash thirty days after you have received your separator and convinced yourself of its merits.

Third:—On time in three payments as outlined below.

Plan No. 1.

CASH WITH ORDER PLAN. To our customers and those who are familiar with our "fair and square" honest business methods, who are convinced of the strength of our guarantee, and our promises and who are protected by our guarantee of 30 days free trial or money back—select the machine best suited to your requirements, give us the catalog number with your order and enclose our special price, less 3% discount allowed.

Plan No. 2.

CASH THIRTY DAYS AFTER RECEIVED. Select the separator best suited to your needs. Deposit the money in your bank and include with your order a letter or statement from your banker that the money has been deposited. Then, thirty days after you receive it, which should be sufficient time for a thorough test and trial, instruct your banker to forward the purchase price to us.

Plan No. 3.

ON TIME IN THREE PAYMENTS. To those of you who wish to follow the custom of many separator buyers, mention the catalog number in your order and include one-third the purchase price. State you wish shipment under plan No. 3. We make a natural charge of \$2.50 each in addition to the price of the separator for the time extended and for bookkeeping, and the entire price of the separator is to be paid in three equal payments—one-third with order, one-third in two months, one-third in four months. In this way you can make the extra cream profits pay for your machine, which the Sharples is bound to give you. Upon receipt of your remittance of one-third (or previously, upon request), we will forward blanks for your signature.

Thirty Days FREE TRIAL in Any Event

No matter what plan you choose, whether you send cash with your order, cash after thirty days or buy your Separator on time in three payments, we want you to distinctly understand that your purchase is made under our liberal 30 DAYS' FREE TRIAL. Understand, there is no obligation whatever connected with your trial of any Sharples Tubular "A" Cream Separator, you would like to see and examine and try in your own home on your own work.

3 PLY AJAX

RUBBER ROOFING

\$1.16

**Per Roll
108 Sq. Ft.**

Take Advantage of this Special Offer on AJAX!

WE have just purchased the entire stock and output of one of the largest factories handling high grade rubber surfaced roofing. This was made for the benefit of Buyers from this catalogue only. The stock is made on an excellent backing of wool felt, saturated with asphalt only.

To disclose the trade name of this material would assure you that it is worth twice as much as you are paying for same, and the only reason we can offer you the material at the low prices we are quoting, is on account of the fact that it is put up two to four pieces to a roll.

This by no means injures the quality of the material, but explains the price. We furnish each and every roll complete with nails and cement. By opening up two or three rolls of material at a time, your roofing can be easily sorted to fit rafter or eaves of any length.

13DW303.	Ajax	3	ply.....	\$1.16 per roll
13DW302.	Ajax	2	ply.....	1.06 per roll

SLATE COATED ROOFING

\$1.26 Per Roll
108 Sq.Ft.

THE slate surface roofing we are offering at \$1.26 per roll is full standard weight stock, made on a saturated felt backing surfaced with red or gray crushed slate. It is put up in full rolls 108 square feet to the roll, 2 to 4 pieces to a roll, complete with all necessary nails and cement used in laying. The material we are offering at \$1.26 has been more or less damaged in transit and in bundling. It is sold as it is, without sorting and without opening the rolls before shipment. The ends may be more or less bent or broken and the surface more or less imperfect, but we know that the price quoted on this material makes a bargain. Limited as to quantity.

Lot No. 13DW112. Red or Gray Slate Mill Ends, Unsorted. Price, per roll..... **\$1.26**

SORTED SLATE ROOFING OF BETTER QUALITY

We have a larger quantity of this same class of material described in the above lot, more carefully selected and more perfect in every respect. Each and every roll has 108 square feet, made up of from 2 to 4 pieces, and it is certainly well worth the difference we are asking in price. Complete, with nails and cement.

Lot No. 13DW118. Slate Mill Ends, Sorted. Per Roll..... **\$1.56**

NOTE: THE CUT ON THIS FIRST QUALITY STOCK FROM
\$2.13 PER ROLL REGULAR PRICE TO \$2.00 PER ROLL

FOR the benefit of our customers who are going to re-roof their residence, their barns or any building upon which they desire to put a first Quality Guaranteed Stock, we have decided in this "PRICE WRECKER" to again offer our own guaranteed roofing at extremely low prices. OUR GOLD MEDAL is our Banner Stock covered by a 20-year quality and service guarantee. It is made on an excellent backing of long fibred wool, saturated in Hot Asphalt and surfaced on both sides with a very fine layer of Ground White Marble. Will resist fire and lightning, requires no paint, and will give long and lasting service. We believe that in the manufacture of this roofing we have attained a near mark of "Perfection" and offer you the material at this special price, complete with nails and cement, for immediate acceptance, only.

No. 13DW211. Rawhide Stone Faced Metal Roofing. Per Roll..... **\$2.00**

RED OR GRAY SLATE COATED SHINGLES

These shingles are standard size and standard weight. They are 8 x 12¾ inches in size and are laid 4 inches to the weather and ½ inch apart. It requires, and we furnish, 424 shingles to cover a square of 100 square feet. They are factory seconds, so sorted, because of imperfect surfacing. The backing and body of the material used in the manufacture of this shingle is perfect, but the surface coating may be imperfect or loosely imbedded in the body of the shingle along one edge or one end. They make a first-class roof covering, and by sorting the shingles as to defect, they can be used to a good advantage and are offered at an extremely low price.

Lot No. 13DW109. Slate Shingle seconds, unsorted, red or gray, at, per square..... **\$3.25**

QUALITY ROOFING

EXTRA HEAVY High Grade

We secured by a fortunate cash purchase a mixed lot of 8,950 rolls of the following Quality Roofings usually sold by others as high as \$4.00 per roll: (1) Extra Heavy Asphalt Slate Coated Roofing, red or gray with a burlap reinforced layer; (2) Extra Heavy Rock Faced Roofing; (3) Extra Heavy Brown Pebble Coat Roofing; (4) Extra Heavy Mineral Surfaced and Double Sanded Roofing; (5) Extra Heavy Mica Surfaced or Mica Flake Roofing; (6) Extra Heavy Red and Gray Slate Coated Roofing on special asphalt saturate felt backing.

Remember! that roofings of these kinds are extra valuable, because of the scarcity of felt and other roofing materials. Now, if ever, is the time to buy, even if you don't intend to build or repair until later.

THE REASON For the Snap Price

We purchased a large quantity of this fine roofing before the tremendous advances

in the price of roofing felt. Being on the look-out—always—for snaps for our customers, we secured this small but high grade stock at tremendous savings. You get the benefit of our Price Wrecking Ability. Our prices to you include only a small profit.

ORDER NOW! Supply is Limited

All of the above brands are of equal high grade. In sending us your order, please advise us, first, second and third choice of the brands quoted above. We will ship as requested while the stock lasts, and if anything you have selected has been disposed of, we will send you the nearest brand to your choice according to our best judgment.

Order by lot No. 13-DW-1104. Miscellaneous EXTRA HEAVY Roofing at \$1.75 per roll of 108 square feet.

EXTRA HEAVY SHEETS, \$2⁵⁶

\$4.00 Roofing Now Cut to Almost Half

Never before in the history of the iron market, has the roofing industry been obliged to meet such conditions as we have faced for some months back. While many buyers are prejudiced in favor of galvanized sheets, it has become an established fact that painted roofing of extra heavy quality well taken care of, will give excellent service at a lower price and does not require an unusual amount of care.

26 GAUGE The market on black sheets in 26 gauge at this time is \$4.00 per square, but realizing that thousands of our customers will not purchase at these prices, we have placed in stock a most fortunate purchase to tide over present conditions. The stock is extra heavy, 26 gauge painted, 2½-inch corrugated sheets, reclaimed and refinished. We will paint these sheets with mineral asphalt black or oxide red.

BUY TODAY!

Supply Is Limited

While it is impossible for us to give exact stock sizes, we ask only that you give us the length of your rafters and the size of your roof, and we have arranged in our Order Filling Department to specialize on each and every order, sending lengths and widths that will work into your best possible advantage. To see this stock would mean the booking of your order, and inasmuch as our stock is limited, we urge quick order or reservation of material.

Lot No. 7DW1206—EXTRA HEAVY 26 Gauge Corrugated Sheets, sorted as to length of rafter given on order at - - \$2.56 per square

Square

EXTRA HEAVY 24 Gauge \$3⁷⁶

Just received a quantity of EXTRA HEAVY 24 gauge Galvanized Corrugated Roofing. During this great 90-Day Price Wrecking Sale our customers get the benefit of this tremendous saving. The market price today for this weight sheet is \$8.00 per square of 100 square feet. We offer our stock until sold at \$3.76 per square. Send your order now—no matter when you intend to use the material!

THE REASON For the Snap Price

They are reclaimed and refinished and are perfectly serviceable. They are furnished only in 2½-inch corrugation. We will paint this stock free of charge with our special red mineral paint which adds to the wearing quality.

These sheets come in average lengths of 4 to 4½ feet, some as long as 6 feet.

ORDER NOW! Supply is Limited

In booking your order, give us the length of your rafters and the size of your roof to enable us to send you the proper proportion of lengths from stock that will work to the best advantage on your roof.

If you intend to use any galvanized roofing during the season, you had better order now at these SMASHED prices.

**Now Is The Time To Buy
Your Engine**

NEVER before, and probably never again, will we be able to offer our customers such a wonderful engine bargain. The Rumely-Olds engine is so well known that any extended introduction is really unnecessary. It is enough to say that these engines have been built for more than thirty-three years. Unlike many of the untested and untried engines now offered, there is nothing experimental or uncertain about them. Every feature has been thoroughly tried out under every conceivable condition. As a result, the Rumely-Olds is today, as it has been for many years, the foremost engine on the market.

Saves You Half Now!

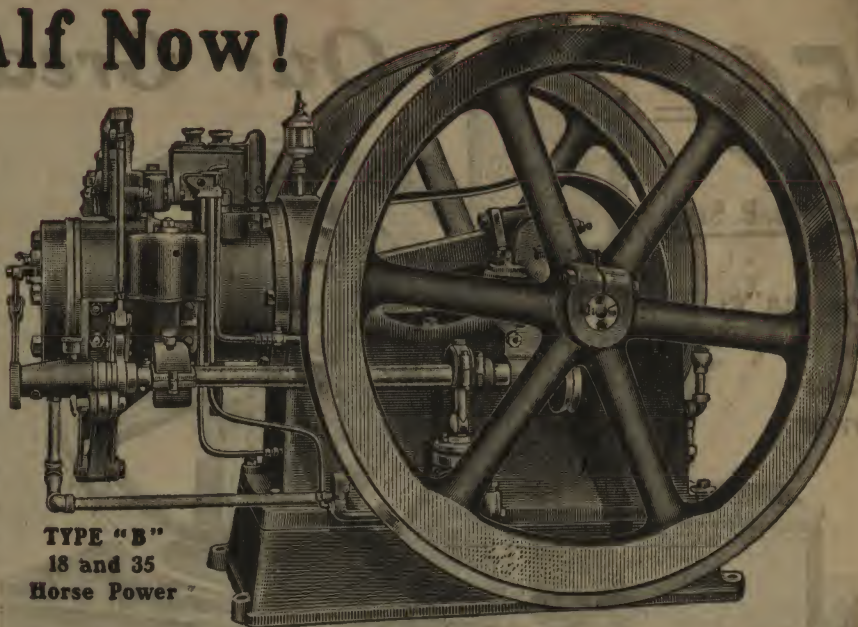

Quality, Durability and Economical Operation

EVERY Rumely-Olds engine must be right before it leaves us.

These engines have been assembled under a most rigid system of inspection. They have been actually tested in every detail and must come up to the highest standards of quality, durability and economical operation. Every shipment is made under the provisions of our well known money-back guarantee, which assures you of complete and lasting satisfaction. Every Rumely-Olds engine must be right before it is shipped. It makes no difference what your power needs are or where they are, there is a Rumely-Olds engine that will fill every requirement.

Develop One-Fourth More Power Than Actual Rating

Contrary to the usual method of overrating the power of engines, the Rumely-Olds engines as described on these pages are actually underrated. In numerous tests which we have had the Rumely-Olds has developed one-fourth more power than the actual rating. The long experience of the makers in engine building has enabled them to embody the greatest possible power in the respective sizes listed. If you have any thought of buying an engine, consider the big opportunity we are offering here. We are ready to inform you fully on any points not covered in these pages. Get in touch with us today.

TYPE "B"
18 and 35
Horse Power

The Rumely-Olds type "B" engine is throttle governed. The cylinder is water cooled, with closed water jacket, to be used with circulating tank or running water. Relief valve makes starting easy.

We have a limited number of the Rumely-Olds type "B" engines in 18 and 35 horse power sizes. Thousands in use today and giving complete satisfaction. Recommended to those wishing a large engine with all the splendid features, ease and economy of operation, as found in other engines of smaller sizes, but with surprising power for their respective sizes.

THE RUMELY-WATTS CORN SHELLER No. 2

A light easy running sheller, requires less power to operate than any other sheller made. Will shell your corn for about half of what it would cost you to have the work done by a contract sheller. Shell any kind of corn you wish in this machine. No regulation or adjustment necessary for ears of different size. Height 3 ft. 9 in., length 5 ft. 4 in., width 3 ft., weight 254 pounds, power required 3 to 6 H. P., capacity 75 to 100 bushels per hour.

36-DW-1225 with equipment including 9½ ft. elevator, 8 ft. cob stacker, 8x4 lagged pulley and fan. Special for 90 days\$19.50

36-DW-1226. Grinder for No. 2 sheller, equal to the best small grinder made. This machine with 1 H. P. engine will grind 3 to 5 bushels of corn per hour. Special 90-day Sale Price of this machine.....\$ 5.00

THE Rumely-Watts Sheller consists of a heavy cast iron cylinder with lugs. This cylinder is mounted on a heavy steel shaft, running in babbitted bearings. The cylinder is enclosed in a steel jacket which has a perforated bottom, allowing the corn when shelled to drop to a cleaning screen and through that into a spout at the bottom of the machine. The shelled corn is then elevated and deposited in bags, wagon box, or any place you wish.

One advantage of the Rumely-Watts Sheller is that it does not have to carry the corn to one side, or to a corner of the machine after shelling it. The perforated steel jacket around the cylinder allows the grain to free itself the instant it leaves the cob. After being shelled, the corn drops down on to a cleaning screen where dust, dirt and bran are blown away. In case you wish to feed the "Cob Bran" you can save every particle of it. A damper, or cob regulator, is placed over the cob-throat of the machine, and by lowering this damper the cobs are held longer in the shelling cylinder. This removes every particle of the feeding value with the corn, without chewing up the cobs or splitting them. When you wish to have the bran with the corn, the belt operating the blast-fan must be thrown off.

The Rumely-Watts Sheller has only two wearing parts—the two babbitted bearings of the cylinder shaft. No machine could be more simple. That's why the machine proves so dependable and durable. The space between the cylinder and jacket is filled with ears which roll over and over, so you have one soft surface rubbing against another, and the kernels are not damaged.

4B. Corn Sheller**

**During this
Big 90 Day
Sale**

\$110⁰⁰

THE RUMELY-WATTS CORN SHELLER No. 4B

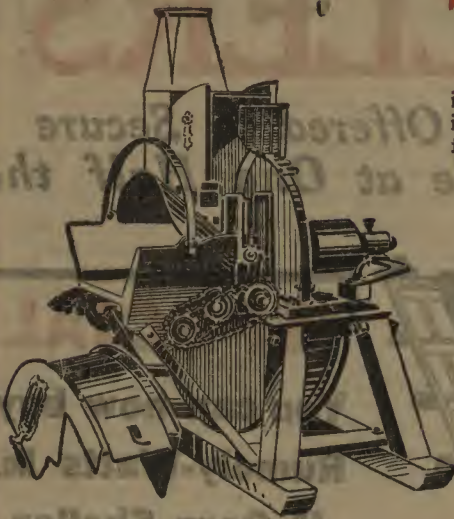

Has the reputation of being the best corn sheller on the market. Double cylinder type, of sufficient capacity for all general and contract work. The cylinders revolve in opposite directions. The ears are fed through a big feeding throat and run the full length of the first cylinder. The teeth of the cylinder are set spiral fashion and throw the ears to the left and they are carried clear through to the other end of the cylinder. The ears are then thrown to the other cylinder and all the way back along the right side of the machine. This long trip insures thorough shelling of each ear, all ears kept on the move. The cobs are discharged through the cob outlet; not necessary to force them out through a small opening. No holding back or grinding of cobs. The machine does all the work. Complete with husk wing and fan, 9 ft. elevator, 14 ft. stacker, 8 ft. feeder, on all steel truck. A big complete sheller in every way. Weight 1,560 pounds, capacity 125 to 225 bushels per hour. Power required, 10 to 12 H. P. 36-DW-1231. Special 90-day Price.....\$110.00

Rumely Advance Ensilage Cutter

The above cut shows the simplicity of the Rumely Advance Ensilage Cutter and gives an idea of the accessibility of all parts when the cover is removed. Note the sure-acting safety device and the provisions for a strong, solid machine throughout.

The delivery pipe is made light, so that it can be put up readily. It is made strong, so that it cannot easily be bent out of shape nor worn by the friction of the silage. The delivery pipe used with the Advance Silage Cutter is not only smooth inside, to reduce friction; it is also made practically air tight, so that none of the force of the blast is lost on the way—it is all used to carry the silage to the top of the silo. The top of the distributor hood is reinforced by a steel sheet, where the silage strikes it with greatest force in being deflected. This sheet resists the great wear at this point.

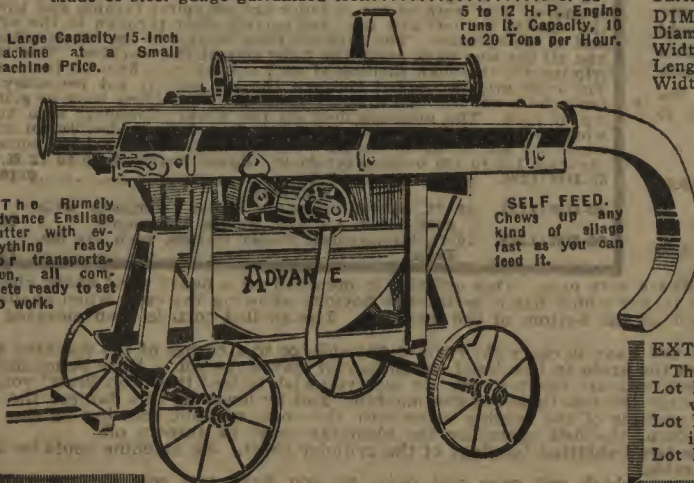

Specifications and Prices are as follows:

Rumely Power Feed Mill

Showing the Rumely Feed Mill Complete

FOR sturdiness, ease of operation, and economy, Rumely sets a high standard. These machines are the result of long study to perfect a machine that will meet with the full approval of farmers who want the best. There are many features about the Rumely Mill which enable it to fill these requirements.

It has few parts, and they are simply, but strongly, put together. Every bolt and nut can be easily gotten at. You will be able to learn in a very few minutes just how to run a Rumely and then you can make it do its best for you. It has proven many times that it is just the smooth running, uniform grinding mill that we claim it to be.

These mills are designed with cob crusher for grinding cob corn especially. They also do good work with the smaller grains, such as wheat, barley and oats.

We furnish these mills in three sizes, 8 and 12-inch grinding plates as given in the specifications below. The illustration shows a picture of the intermediate size No. 10. Each of these four mills is identical in construction, except as to size. Into each we have put the best materials obtainable and expert workmanship.

The horsepower necessary to drive these mills varies from 3 to 15, depending upon the size of the mill and condition of the grain. The No. 8 mill is an excellent general purpose grinder. It takes any kind of grain and does an exceptionally efficient job. The No. 10 and 12 mills, on account of their great capacity, are especially desirable for stockmen and dairymen.

These mills are built of iron construction throughout. They will stand up under the biggest loads that their roomy hoppers will hold. The hopper is smooth inside with no crevices to catch and hold the grain. Each iron leg is provided with a punched flange, so that the mill may be fastened anywhere to sills or floor. These mills are equipped with heavy balance wheel.

We show herewith a cut of the grinding plates. They are made of 30 per cent steel alloy; they have the hardness of white iron and the strength of steel. Each grinding plate is securely held to its iron discs by four square-head plow bolts. Construction is very strong. Plates are easily removed with a wrench.

The mills are regularly furnished with medium burrs. An extra set of coarse burrs is sent with the mill. Fine burrs may be had at slight additional cost. Rumely burrs are sharpened until each tooth is true. Bearing rib on back of the burr is then ground parallel. Grinding plates are held in position by a heavy spiral tension spring. This spring will permit the plates to separate if a stone or other substance gets in between the plates. A wooden breaking pin in the yoke makes this more sure. A lever is provided which enables you to separate plates if you are standing by mill.

THE COB CRUSHER

The cob crusher is of excellent design. It is made in seven sections. This means a saving of money in case one of the parts breaks. A section may be replaced for a few cents. An entire new crusher would cost several dollars. The concave beneath the shaft is part of the crushing machinery of the mill. Its grooved construction assists the crusher in feeding the grain to the grinders.

All Rumely Mills are provided with a cut-off in the hopper. By this cut-off the supply of grain to the grinding plates may be regulated. You can catch any foreign substance which falls into the hopper.

Every Rumely Feed Mill is fitted with a lever by means of which you can separate the grinding plates quickly at any time it is necessary to save them from grinding upon any foreign substance.

The burrs in Rumely Mills are further safeguarded by hinging the yoke to the body of the machine with a wooden breaking pin. Note that the Rumely burrs are therefore doubly insured against injury, should a stone or similar substance come between them. Rumely Power Feed Mills are also provided with wooden breaking pins in the concave. This device saves crusher and concave from many a hard jolt. If foreign matter gets between the crusher and the concave, the wooden pins will break, allowing the concave to drop and to throw out whatever has caused the strain.

We also show below a cut of a 5 ft. elevator, which is furnished extra, and can easily be attached, to the 8, 10 and 12 in. sizes. It is of double spouted construction and is operated by cross belt from main shaft. Pulleys easily adjusted to length of your belt. We can also furnish a 12-ft. wagon elevator with swinging spouts, for attaching to 8, 10 and 12 ft. mills.

These are furnished in four different sizes, and the prices and specifications are as follows:—

Junior Balers

These Balers are especially handy for barn baling, light for easy transportation, and of big capacity, making bales up to 85 lbs. with the 14x18, to 100 lbs. with the 16x18. They are well adapted to custom work when weight of bales desired is within their capacity.

HAND FEED.

Lot No. 36DW1217, size 14x18, **\$224.50**
wgt. 3570 lbs. Price each.....
Lot No. 36DW1218, size 16x18, wgt. 3790 lbs.
Price each.....**\$244.50**

Standard Sizes

These Standard Sizes are designed especially for heavy custom work, and for farms where a great amount of baling is to be done. They are strong and of big capacity. We quote them with hand feed, as follows:

Lot No. 36DW1219, size 16x18, **\$284.50**
wgt. 4970 lbs. Price each.....
Lot No. 36DW1220, size 17x22, wgt. 5210 lbs.
Price each.....**\$298.50**

SIZE OF ENGINE REQUIRED:

Four and one-half H. P. engine will operate either Junior Baler with good results, but to get full capacity, a 6 H. P. engine is required. An 8 H. P. engine will operate either of the Standard Presses when feeder is not used; when feeder is used, to get the best results, a 10 or 12 H. P. engine is needed, but this is too heavy to be mounted on the Baler.

Extra

We will furnish Steel Extension for mounting Gasoline Engine for any of these sizes at an additional cost.

Lot No. 36DW1221. Steel Extension.....**\$10.50**

Steel Trucks

We will furnish Extension Trucks for mounting Gasoline Engines at an additional cost.

Lot No. 36DW207.....**\$22.50**

Self Feeders

All presses are furnished with hand feed. We can, however, furnish them with the Rumely-Robinson Self Feeder, and this attachment will prove a most profitable investment, as it greatly increases the capacity, and eliminates the feeding table, and the work of one man. The material to be baled is pitched directly on the carrier. This carries it up to the feeder, where it is put into shape for entering the hopper by means of a picker roller.

These self-feeders are specially designed and patented. It works on the principle of pitchforks—the natural and most efficient method, and does not break up the hay or straw.

We do not recommend self-feeders for barn work, as it takes up too much room.

Lot No. 36DW1222. Price for **\$87.75**
Self-Feeder.....

THEY are absolutely the best Baler on the market. They come in four sizes—are strong, efficient, light running, of big capacity, and make neat bales that hold their shape.

The angle-iron frame is heavily braced, supported and riveted throughout. All gears are made of semi-steel, and designed to give speed and strength. The foot feed and arm are adjustable. The plunger is driven by heavy gear wheels that can be turned 180 degrees to present a new working face in case of wear. The plunger box is made of selected hardwood with a cast iron face. The baling chamber is strong. It is made of steel and there is no chance for it to spread. The tying chamber is long and convenient for the tier to work.

Every machine has a good sized feed opening, which makes rapid feeding and big capacity possible. An extension frame makes it possible to mount a gas engine on the same frame with the baler. The steel trucks can be removed from the baler frame and attached to the gas engine extension to make the engine portable. The Rumely Baler is simple, strong and of high quality throughout.

The Frame The Rumely-Robinson Baler frame is built for strength. Heavy steel angle-irons extend from end to end. They are stayed and reinforced by solid plates that carry the twin gears in front, and also by the plates on the sides of the baling chamber. There are also several heavy steel standards on the sides. The top and bottom of the frame are strengthened by steel angles, and by the large steel plates that nearly cover the whole rear half of the frame. All parts are closely and heavily riveted together. The front of the frame is diagonally tied by heavy steel bars. Wooden pieces are interposed between the heavy cast iron main shaft boxes and the steel frame to absorb vibration and prevent loosening of bolts. The entire frame is built substantially throughout.

The Gearing The shafting is extra heavy, with long babbitted boxes held in a continuous iron bed on each side, maintaining alignment of both shafting and gearing. The power is applied to the pulley bolted to the side of the heavy balance wheel. On the other end of the same shaft is a heavy double shrouded single gear, built to carry all the strain that is intended to be borne by two gears on some machines. On the same heavy shaft with the side gear are two double shrouded pinions, shrunk and keyed to the shaft. The power is transmitted from these pinions to separate twin gear wheels. Each one of the twin gears is mounted loosely upon a projecting stud from heavy side plates on the frame. An opening on the side of the plate and an oil hole in the inner side of the stud makes it possible to place oil or oiled waste in the opening and thereby insure proper lubrication.

The Plunger Head The plunger head is of the box pattern, and has a heavy cast-iron face. The sides are of seasoned hardwood and are thoroughly braced with steel bars. This holds the head perfectly square against the uneven pressure which is always found in ordinary work.

The Pitman The pitman is made of long heavy double-trussed steel pieces, with a casting on each end. Heavy pins connect these castings with the twin gears on one end, and the plunger head on the other. The pins can be changed easily if they show effects of wear.

Feed Opening The Rumely-Robinson Baler has a large feed opening. By this we mean, not the outer dimensions of the hopper, but the smallest opening through which the hay must pass in being put into the chamber. This large opening makes the Rumely Baler a big-capacity machine. It also keeps the hay from being broken up.

Rumely Standard Electric Light Outfit

75 LIGHT=30 VOLT PLANT

Complete With Willard Storage Batteries

\$197⁵⁰

Complete with Rumely Dynamo, Willard Batteries, Falk Gasoline and Kerosene Engine. Warner Switchboard and FREE WIL-LARD SERVICE Wherever You Live!

No Cranking of Engine

Engine Runs on Gasoline or Kerosene

Plant Can Be Easily Operated by Anyone

Automatic Start

"Just turn the switch" and the engine starts. No cranking necessary

WE STILL have a limited number of these plants from our original purchase in the 75-150-300 and 500 light outfits. Each equipment consists of a standard high grade electric light engine, with all equipment and built-in magneto, one shunt wound generator and self-oiling bearings, fitted with carbon brushes, one switchboard containing rheostat, volt meter, ampere meter, ampere hour meter, circuit switch, automatic switch, battery switch, dynamo switch and starting switch. Lead wires are placed from the generator to the switchboard. These plants are brand new and complete in every detail.

Universally Used These Rumely Standard Electric Light Plants are used extensively in farm and suburban homes, hotels, summer resorts, public buildings, factories, stores, moving picture shows, and, in fact, any community where independent, reliable electric service is desired.

Besides providing current for lighting, they can be used to furnish current for small motors which will operate many machines as feed mills, washing machines, cream separators, sewing machines, etc., as the additional cost of small motor will be very little.

The Falk Engine This engine is built especially for electric lighting purposes where close regulation and high efficiency is necessary. It is equipped with extra fly wheel; latest type throttling governor, which insures constant steady running. Designed to be used with kerosene or gasoline. Equipment is so arranged that it can be run in parallel; that is, the current taken from storage batteries, and if more current is desired it can be run from generator as well, doubling the capacity of the plant.

\$10,000 BOOK OF PLANS

Photographic Reproductions of More Than 100 Modern Harris Homes

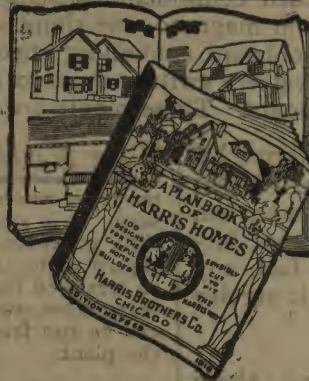

Your copy is ready. Write for it today—The Harris \$10,000.00 Plan Book is the handiest help for home builders ever printed. It is the key to right building with an enormous saving of money, time and labor. Upwards of 100 practical Harris Homes with plans, descriptions, prices and valuable information and advice, material, specifications, facts for greatest buyers, letters from builders everywhere who have made a big saving from this remarkable book. And it tells you—

How to build "The Harris Way."

How to save money, time, work and worry;

How to be your own superintendents;

How to boss your own building job and know that everything is done right, without waste.

Write Today For This Splendid Plan Book

The Harris Homes on these pages have been chosen at random from the pages of this beautiful book of plans. These pages give you only a faint idea of the wide range of modern American homes, carefully illustrated and described with floor plans and all details. A letter or postal request brings your copy by first mail—free.

HERE'S PROOF FROM MEN JUST LIKE YOU

Harris Brothers Co. Plymouth, Ind.

Gentlemen: Before deciding to purchase the material for my recently completed building, I took the time and trouble to investigate and compare prices of the largest material firms in the country. After much comparison along this line I decided that you people have the only real money-saving proposition. I was not short a single item in erecting my house; in fact, I had more lumber left. I saved at least \$300.00.

(Signed) Ormond E. Swinehart.

Harris Brothers Co.

Gentlemen: Both houses complete and occupied. Greatest and best houses that were ever put up in this city. I have been working with you for the past seven years and have received many cars of lumber. Can faithfully say that for grade, quality, quick delivery, treatment, workmanship, honesty and extremely low prices, there is no firm that can equal you. Have saved on one house \$659.00, and on the other \$348.00.

(Signed) Jesse L. Baker, Contractor and Builder.

Write Today—Ask For Spring Building Offer No. DW-22!!

HARRIS HOME DW-92

A neat, trim little bungalow that shows how very attractive a small home can be. Built with great economy of material, sensibly cut-to-fit "The Harris Way." Four rooms, bath and pantry. Size 20 ft. by 28 ft.
Price.....**\$422**

HARRIS HOME DW-117

This bungalow was built for our exhibit at the Iowa State Fair. Six rooms and bath, all on one floor. Built time and again with the same satisfaction and big saving to its owner. Size 39 ft. 6 in. by 27 ft.
Price.....**\$814**

HARRIS HOME DW-109

A splendid example of the big economy in building with material sensibly cut-to-fit "The Harris Way." So many good features everywhere, you wonder at its popularity. Five rooms, bath or pantry. Size 26 ft. by 16 ft.

BLUE PRINT PLANS

Home Builders Save \$25 to \$100 Right At The Start On Our FREE Plans

One section of the Harris \$10,000.00 Book of Plans explains our free blue print plan offers. Select from the plan book the design that pleases you. Send us \$2.00 and we will furnish blue print plans showing in detail just how any one of the 100 Harris Homes are to be built. Understand these plans are free to purchasers. The \$2.00 will be refunded on your purchase of material. These plans are architecturally correct in every detail, carefully figured out by experts of many years' experience; men who are not only architectural designers, but are also practical in every detail of actual contracting and building operations.

Those who build their homes "The Harris Way" from our lumber and sensibly cut-to-fit material save from \$25.00 to \$100.00 right at the start on our free plans. You could not get these plans from any architect of equal skill for less than that! And, remember this substantial saving on plans is just the first step to the big saving we make you on the actual building of your home "The Harris Way." If you have some original exclusive idea for your home you are figuring upon—something radically different from the designs in our book or anything you have ever seen—we are prepared to carry out that idea.

LETTERS ENDORSING "THE HARRIS WAY"

Harris Brothers Co.

Ulster, Pa.

Gentlemen: Find enclosed a note from W. C. Whipple Co. They sent me the same, as I have the work for Mrs. Nesbit's and the Olmstead houses. I feel interested in your behalf, as I do not believe they can furnish better material than your concern. In my 25 years of experience I never used better material and your dealings are as fair as any one could ask.

(Signed) A. C. Hall, Contractor and Builder.

Harris Bros. Co.

Gentlemen: I have had men from three other towns look at my home and they think it O. K. Everything arrived in good condition. I saved on the building, including steam heat and bathroom outfit, about \$1,000, as this kind of lumber would be very dear here.

(Signed) Lewis Young.

Freeland, Pa.

FREE: Complete Book of Harris Built Barns!

This is one of the most important books to all farmers we have ever issued. It offers an unapproached range of barn designs to fit every need at lowest building cost. If you expect to build a barn, the first step to a big saving is to write for this book. All features of barn construction thoroughly covered.

90 Day Price Wrecking Spring Sale !!

Big Reduced Prices on

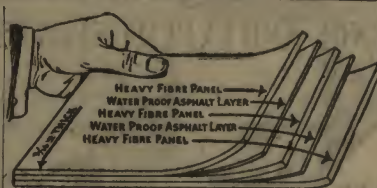

WALL BOARD

\$1.88 PER 100 SQUARE FEET
Regular Standard Thickness

Heavy Asphalt Inlaid CEIL-TITE Construction

Lower Instead of Higher Prices. Here is the grandest special lot of Wall Board that we have ever offered to the Wallboard-buying Public. Think of it—Wallboard being sold direct to you today at less than the cost of manufacture. Those who have tried to buy Wallboard manufactured of paper, pulp or the products necessary to make same, will understand at a glance that here is a bargain of a life-time. The price will never again be as low. It is only through a fortunate purchase and the fact that we must have the room where this stock is now piled, for other purposes, that we are able to offer it to you at this tremendous reduction when everybody else is raising prices right and left, due to the extreme scarcity of raw materials entering into the construction of Wallboards of all kinds. We guarantee this board to be impervious to water, moisture, or dampness. Vermin and germs will not nest or breed in it. It is a non-conductor of sound, heat or cold, and possesses greater tensile strength than plaster. It is fire-retarding, resisting heat to a degree of high intensity. You can paint it white, wash it, calcimine it, decorate it, paper over it, stencil it, fresco it, in fact it is susceptible to practically every modern wall treatment. Shipped direct from Chicago stocks. The slight discolorations do not affect its value.

HOT BED SASH

At Wholesale Cost Now!

BEST QUALITY, CLEAR

THIS IS THE BEST INVESTMENT YOU WILL EVER MAKE

Here is an opportunity to get your supply of the very best grade of Hot Bed Sash at extremely low prices. These are made in the best workmanlike manner, of Clear Soft Oregon Fir, a wood unequalled either for interior or exterior use. Perfect in manufacture, perfect in putty work and glazing. No seconds; just a real bargain in high-class goods, made for us during the dull winter months in order to keep factory organization and expert help intact for the usual Spring rush of regular millwork stock.

They have the following superior points over any other Hot Bed Sash on the market:

1. One and three-eighths inches thickness of wood. Size, 3 ft. x 6 ft.
2. Four rows of glass.
3. Clear stock.
4. Standard size glass.
5. Large triangle points.
6. Strong center bars.
7. Extra size tacks.
8. Glass set by hand.
9. Chicago shipments.
10. Pure Linseed Oil Putty.
11. Extra deep rabbet.
12. Primed in oil.
13. Maximum of strength giving qualities.
14. Minimum of useless and shadow-casting bracing devices.

Lot No. **10DW1704.** Open (not glazed), Hot Bed Sash, as described above. Regular price, \$1.20. Our SPECIAL Price, each..... **79c**

Lot No. **10DW1701.** Exactly the same as above. Glazed, with strong, clear glass. Regular price, \$2.20. Our SPECIAL Price, each **\$1.79**

Sash must be ordered in lots of 6 or more to get these prices. On orders for less than 6 add 10c per sash.

SPECIAL NOTICE. We will furnish these Sash with the woodwork painted white, which will make them last twice as long as any other Hot Bed Sash on the market, and greatly increase the diffusion of light, at the very small price of 30c per sash extra.

Oak Flooring

53c
Per 100 Lineal Feet

Lot No. 22DW112

130,000 Ft. Oak Flooring !!

Here is the best chance you ever had to buy oak flooring. You can see at a glance our price is about half the regular price. Manufactured exactly the same as regular stocks you buy in any first-class lumber yard except the bundles as a whole may average about 1 ft. shorter than regular stocks; but as this flooring is end matched it makes no difference what the lengths are because when once put together they will "stay put." Clear and Select are both suitable for residence floors. No. 1 we recommend as being suitable for store rooms, shops and other cheaper floors where clearness of lumber is not necessary, but where a good strong hard-wearing floor is desired that will not sliver up.

3/4-in. Outside Casing

90 Day Price Wrecking Spring Sale !! SUPERIOR POULTRY FENCE

The Tie used in Superior Poultry Fence possesses unusual merit. It serves perfectly the intended purposes and there is absolutely no waste of wire. The construction is such that the tighter the fence is stretched, the tighter all wires are drawn together. It is also a durable knot for the reason that there are no cut and exposed ends of wire and neither are there any sharp bends to break and crack the galvanizing coat.

Superior Poultry Fence is one of the most popular on the market and the heavy demand for it is certainly good evidence that it is a satisfactory and serviceable fence. It is suitable for enclosing poultry lots, gardens and young orchards. Neither the line or stay wires can be slipped and it is woven sufficiently close to turn all kinds of poultry and small animals. It is, in fact, one of the most practical and satisfactory combination poultry and stock fences ever offered and the price is exceptionally low.

Do you realize that you take no chance at all in buying this fence? Our thirty-day trial fully protects you. You may erect the fence and if it is not satisfactory within 30 days, take it down, return it to us and we will pay freight on same and refund your money in full.

Put up in 10, 15, 20 rod rolls.

Harris Woven Wire Lawn Fencing

61c Per Foot

If you want to beautify your home now is the time to buy as this offer is limited.

Harris Woven Wire Fencing

is made of the best grade of galvanized wire. The design is plain and substantial as shown in the cut above. This is a fence that will be suitable in any surroundings, harmonizing well on any lawn. Can be used with either steel or wood posts.

Specifications:

Uprights are made of No. 9 heavy galvanized wire, crimped the entire length. Cabled line wires are of heavy galvanized wire, with stays between the uprights, 2 1/2 inches. Cables are spaced 6 inches apart, except the top wire, which is spaced 2 3/4 inches. We can furnish same to you in the following sizes:

No. 2DW428. 24 inches high. Per lin. ft..... **6 1/2c**

No. 2DW429. 30 inches high. Per lin. ft..... **7c**

No. 2DW430. 36 inches high. Per lin. ft..... **7 1/2c**

No. 2DW431. 42 inches high. Per lin. ft..... **8c**

No. 2DW432. 48 inches high. Per lin. ft..... **8 1/2c**

The above fencing can be furnished in any continuous length up to 300 feet.

Galvanized Wire Shorts

\$3.00 Per 100 Lbs.

A LIMITED QUANTITY

This wire is put up in bundles of 100 pounds and consists of what is termed as wire shorts or mill ends, which are factory ends accumulated from the regular galvanized fencing wire. In other words, this wire is practically as good as the regular wire, only that instead of continuous lengths, it runs from 30 to 100 ft. It is all new wire, put up in bundles of 100 pounds, as nearly as possible one gauge to the bundle.

No Advance In Prices If You Buy Now !!

\$1³² PER GAL. Guaranteed Paint

36 Different Colors

Spreads Farther, Wears Longer, Costs Less

P AINT buyers get bigger and better values during this sale than ever before. There is more real quality in one gallon of this splendid paint than many reputable brands selling everywhere at considerably more. Lack of space renders impossible a thorough description of its merits—but we urge you to read the next few lines, noting our claims and see the big saving in our low sale prices.

The durability of this ready mixed paint is due to its splendid formula. Pure linseed oil, lead and zinc are its main ingredients and mean—it's the oil that makes paint wear. It works smoothly under the brush and can be brushed out to a greater spread than any other paint we know of. Combine this feature with the absolute non-fading properties of the colors and you have the secret of its extreme popularity with thousands of paint buyers everywhere who know.

Special Low Sale Prices!

Make Your Auto Look Like New 75c

This is a combined gear and finish varnish—a special, high grade article, compounded in our large paint factory. It is made in a secret process which eliminates the finishing room and the expert finishers from all jobs. Now all you have to do is to apply this varnish to your auto, buggy, or boat; it dries quickly and evenly, leaving a bright surface as smooth and hard as plate glass. Sun, heat, rain or cold will not affect it. "Every drop is GUARANTEED." A special feature is the patent nozzle top, which always keeps the varnish fresh.

Galvanized Iron Machine Boxes 75c

We have about 2,000 galvanized iron boxes or pans with open tops which can be used for many purposes, made of about 18-gauge galvanized iron, securely riveted and seams lapped; dimensions below include the overlapping flange made of the same material. One end of the above tapers down about 4 in., while the other end is straight up and down. Painted red on the outside and white inside. They have 3 ¾ in. holes in the bottom about 6½ in. apart. These, however, could be plugged up or a washer of some kind put in same to make them tight if desired this way.

Lot No. DC-DW999—Inside measurements, 31 in. long, 8 in. wide, 5½ in. deep. Outside measurements on top, 33½ in. long, 10½ in. wide. Price, each.....75c

Banner Bone Mill

\$1.95
FOR THIS SALE ONLY

This is just the grinder that a small poultryman needs, and is also serviceable around a big plant. Teeth are strong and coarse and will grind oyster shells, gravel, old crockery, cracked corn, bone and other coarse feed for chickens. Burrs are adjustable, so that any material can be ground, all done by powerful jaws and burrs of this machine. This is a mill which we could retail honestly at \$4.00, and be giving you a good value, but during this sale, our price is only **\$1.95**

Order No. 8DW8021. Weight, 35 lbs.. **\$1.95**

Little Giant INCUBATORS Big Values

Shipped from Factory
66 Egg Capacity

This 66-egg incubator differs from others, being more efficient. Proved so by careful tests, need not hot air heating and ventilation system, made entirely of metal with the exception of glass top. Body is heavily insulated, first with heavy special lining felt, second by a heating chamber which reaches down to the eggs, giving perfect protection, absolutely fireproof, no wood to warp, check, crack, decay, or absorb poisonous gases. Built round like a nest, no cold corners, where stagnant air can accumulate. Glass top enables you to see entire surface of egg chamber, and the thermometer which is above the eggs is plainly visible, making it unnecessary to open hatch. No trays to handle. Eggs remain in the hatcher while being turned and aired; by lifting up top and placing on a special stand rack, eggs can be quickly turned by rolling with the flat of the hand. The regulator is part of the top, and no matter how often you remove it, is in no way affected. Has an expansion and contraction powerful sensitive double water thermostat, only one bearing and one adjustment.

No. 8DW2995. 66-Egg Size.	\$4.95
Weight, 25 lbs. Price.....	
No. 8DW2996. Incubator and Brooder.	\$8.45
Combination Offer.....	

Little Giant Metal Brooder

This brooder, like the incubator, is round and made entirely of metal, heated by hot water, with a complete hot water plant of its own. Operated with automatic fixtures. The heat is provided with a special new safety lamp, located outside of the brooder. The lamp heats the hot water coil, which is located directly under the top of the brooder. The ventilation and regulation is entirely automatic and controlled by the water thermostat. Rust, fire and waterproof. Excellent companion to the Little Giant Incubator.

66 Chick Capacity

No. 8DW2997. 66-Chick Size.	\$3.95

This 5 Piece Bed Davenport Suite Is Yours During This Sale For —

\$35.95

Read This Offer For Our Sweeping 90 Day Spring Sale Only:

You now have the opportunity to furnish an entire living room—day or night—with massive, strong, dependable furniture. Conveniently furnished as a living room by day, or a bedroom at night. All pieces built of solid oak in popular fumed finish. Covering is a good strong artificial Spanish leather. Guaranteed to reach you safely and to be satisfactory, or purchase price and freight charges refunded.

The Bed Davenport

Popular Duofold style, easily opened to make a full size bed, as shown in the small picture above. Two sets of springs; spiral springs for the seat, and linked wire fabric helical constructed springs for the bed. Ample space inside for pad or mattress, sheets, a pair of blankets and pillows when closed. Total length about 60 inches.

The Rocker

Well padded spring seat. Springs are hand tied and supported on channel steel bars securely fastened to front and back rails. Arms, 4 inches wide. Height, 40 inches.

The Side Chair

Same strong construction as rocker and arm chair, except that the seat is somewhat smaller, being 17½ inches square.

The Library Table

Measures 34 x 24 inches, with 3-inch rim all around. Legs are securely bolted to the top, making the table as rigid as any table built. Ends securely braced; wide magazine shelf.

The Arm Chair

The Arm Chair is very similar to the rocker, except that legs are a trifle longer to make the seat a comfortable height. Back posts are shaped to give the back the proper angle for good sitting.

Mattress for Davenport

We can supply a mattress for the davenport of felted cotton, with tufted top and bottom and box edge. Heavy art ticking. This mattress is made especially for the davenport bed. Weight, 20 pounds. Allow Extra \$3.95.

The Duofold Bed Davenport is shipped from Chicago. The Library Suite from factory in Indiana. All are constructed to be packed flat; easily put together. Will give the best of service for many years. Weight of davenport about 200 pounds. Other pieces, packed together, about 160 pounds.

For This Roomy OAK FRONT WARDROBE

In every household there is often need for this good substantial wardrobe. The inside compartment has over 4 ft. clear space below the hat shelf. Equipped with four double coppered steel hooks, furnishing space for 8 suits, overcoats or skirts on hangers, while the shelf will provide space for all the hats in the family. Overshoes and rubbers can be stored in the drawer.

The standard Golden Finish of the hardwood sides is carefully blended to harmonize in color with the figured oak front. The drawer has metal pulls or handle and the doors equipped with lock and key.

Being built in the new improved K. D. hinge side construction, this Wardrobe can be folded up flat and stored away when not in use. Sides being hinged, makes it very easy to put together again. Full directions for setting up are pasted on the door. The hat shelf is strongly supported at ends. The back is cross ribbed, with three hardwood cleats. Shipped from factory in Indiana, packed flat to save freight.

Last Chance To Buy A Low Priced Range !!!

Large Size! **\$25.95**
Guaranteed!!

Good for Coal or Wood

THIS NOBLE ENDEAVOR range holds down the prices because made the most popular size only. Many have been sold and there has not been a single complaint about its construction, quality, appearance or cooking and baking utility.

THE BODY is a finely polished blue steel, which does not need blacking.

THE HEAVY CAST TOP, 26x47 1/2 ins., has six size 3 cooking lids. Edge band, oven door frame, fire and ash pit doors are heavily nickel plated.

THE HIGH CLOSET is the same quality, weight and workmanship as used on many of our higher priced steel ranges, with the addition of a ballustrade at the back top. Heavy steel with cast nickel plated trimmings. If the high closet is not wanted, order back guard with two nickeled tea shelves, and deduct \$2.50 from prices given.

THE HEAVY CAST IRON FIRE BOX is 16 in. long, 7 in. wide and 8 1/2 in. deep for coal. Remove end liners for wood. Reversible duplex grates.

RESERVOIR IS CAST IRON, porcelain lined, with damper arrangement to throw heat directly against the tank when not baking. Tank holds 20 quarts.

Guaranteed to Bake
Cast Encased Reservoir

MEASUREMENTS: Height, 58 in.; height to cooking top, 31 in. Oven, 19 in. front to back, 18 in. wide and 11 in. high. Ohio shipment.

Solid Oak Dining Table **\$9.50**

10-in.
Pedestal

Chicago
Shipment

If you will make comparison of this table with others of similar design, you will find that most of the others have 6 or 7 in. pedestals. Our special solid Oak Table offered for this sale has a full 10 in. pedestal, octagon shaped, skillfully joined, with legs rigidly attached, and ornamental carving at the base. The slides are the most easy running manufactured, such as are used in tables costing two or three times our price. The top is equipped with a lock which catches automatically as the table is closed. The pedestal is non-dividing, 8 ft. length has drop legs to steady the top when opened full length. Good easy rolling furniture castors. Specify Golden or Fumed finish. Weight, about 125 lbs.

Buys This Standard Oak Front Cupboard

You will surely be impressed with the merits of this standard design oak front cupboard, with just the right proportions and the correct amount of storage space for the average home. Sides of seasoned hardwood stained to blend with the figured oak front. Selected popular designed Venetian art glass especially distinguishes this cupboard from cheaper grades of wood panel or perforated metal door cupboards. The dish or china compartment has two removable 3-ply shelves. These, with the bottom of this compartment, make three storage shelves for dishes. Two drawers are convenient for cutlery, tea towels, etc.

The Most Popular Cupboard Ever Offered

The base has strong shelf, making two compartments for storage of utensils and food. Both sets of doors have hooks, latches and metal knobs. The extreme top is ornamented with carving. Finished medium dark golden. Special hinged construction allows packing flat when moving. Can be folded and stored away if desired. Easily set up again. Shipping weight, about 140 lbs. Shipped from Indiana factory.

Judge a phonograph by its tone. The reproducer and tone arm of this Harris Special Phonograph are constructed according to thoroughly scientific principles applied by experts. The improved tone modifier makes it possible to increase or soften the volume of tone without affecting its distinctness. This part is operated while the record is being played without raising the top or interference. Power is furnished by a special double spring motor with worm driven gears. It can be wound freely while in use or before it is started. It is silent, easy running and thoroughly reliable.

Plays any disc record. (Special sapphire needles for Edison or Pathé records 75c; specify which.) You do not have to buy a special kind at high prices. Buy records of your choice wherever you get them the cheapest. Any sort of music, vocal or instrumental, oration, sermon or political speech, can be reproduced in perfect natural tone with this Harris Special Phonograph. Total height, 48 in.; width, 22 in.; depth, 23 in. Wt., boxed, 150 lbs.

Four Beautiful Rugs at Big Savings!!

Description of Rugs Shown on Opposite Page

Seamless Brussels Rugs Special for 90 Days

No. 20DW510 (opposite)

HERE is a new unusually attractive design chosen especially for this sale from more than 400 different patterns. We secured this lot of rugs in connection with a recent big auction purchase which explains the very low prices we are able to offer now. In considering this value please remember this is really a good rug—one that will give you years of best service under the hardest wear—always retaining its original neat and beautiful appearance.

Being the product of one of America's finest mills where only quality rugs are made, you have an assurance of getting a rug that will come up to your highest expectations. Bear in mind this rug has a pure worsted face, closely woven. Deep rubber bound turn-overs make it lie perfectly flat. Study the illustration on the opposite page—note the soft silky pleasing colors harmoniously blended in the beautiful pattern. This rug is suited for your living room, parlor or any room where elegance of appearance is desired. Two sizes to choose from.

Size 8 ft. 3 in. by 10 ft. 6 in. \$12.95
Size 9 ft. by 12 ft. 14.85

READER NOTE: The rug described above is just one of many patterns which we have in this same quality. We can supply oriental patterns, all-over patterns, and numerous beautiful effects in medallions, in practically any color combination you wish. If the quality of the rug above satisfies you, but you do not like the pattern, describe the rug you want. We will then make a selection for you using our best judgment. We will send the rug we select for you entirely at our risk. If you are not perfectly satisfied when you receive it, we will exchange it for another or we will return your money.

Heaviest Seamless Brussels Rugs Special for 90 Days

No. 20DW525 (opposite)

YOU will like this beautiful rug when you see it. You will admire the neat uniform pattern and splendid colors harmoniously blended. These all-over pattern rugs are just the thing for the dining room. They don't show the crumbs, lint or dust and do not soil easily. They are made to wear well and will outlast cheaper rugs by far. These small all-over effects have a tendency to make any room appear larger than its actual size. This is the heaviest quality of seamless brussels made. The face is closely woven from pure worsted yarns, insuring long wear under hardest service, always retaining the original beautiful appearance. Heavy turn-over bindings and ends make it lie flat at all times. Your choice of the following sizes at our ninety-day sale prices:

Size 6 ft. by 9 ft. \$10.35
Size 8 ft. 3 in. by 10 ft. 6 in. 14.95
Size 9 ft. by 12 ft. 17.50

READER NOTE: In our auction purchase we secured a limited number of these rugs just the same in weight and quality as the one illustrated. The patterns vary in beautiful oriental effects. Conventional and floral medallions and numerous other well covered oriental patterns. You can depend upon us to make a selection that will meet your every requirement.

Heaviest Seamless Brussels Rugs Special for 90 Days

No. 20DW520 (opposite)

STUDY the illustration of this rug on the opposite page, carefully. These pictures are accurate photographic reproductions taken from the rugs direct. While some attempt has been made to show the exact pattern and the blend of the beautiful colors, it is really impossible to do the rug justice in this limited space. If you could see and examine this rug, we know you would buy it at once. The conventional and all-over pattern is clear and distinctly executed in pleasing, perfectly blended colors. The wide, beautiful pattern of the border will not be covered by your furniture in your room. This is the heaviest quality of seamless Brussels made. The face is woven from select pure worsted yarns. Deep, heavy bindings at ends make it lie flat at all times. The pattern is suited to any room in your home.

Size 8 ft. 3 in. by 10 ft. 6 in. \$14.85
Size 9 ft. by 12 ft. 17.25

READER NOTE: Our recent big auction purchase brought us a number of rugs of this quality in similar patterns to the above. Also large medallion patterns and several beautiful oriental effects. Many beautiful color combinations are included. You can depend upon us to make a selection that will satisfy you.

Seamless Axminster Rugs Special for 90 Days

No. 20DW515 (opposite)

THESE seamless Axminster Rugs need no introduction or further endorsement among those who are familiar with the most satisfactory made rugs. Rugs of this quality are selling everywhere at considerably more than our low sale prices. Our recent big auction purchase brought us a large number which will go to first buyers during the period of this great 90-day sale. The illustration on the opposite page is a brand new design—probably the most popular color combination ever produced by the mills where it was made. These Axminsters cannot be excelled for wear—they are guaranteed in every respect by the maker. The thick, pure wool woven surface means long wear under hardest service. The wearing surface is thick, soft and luxurious to the tread and eye. If you want a heavy high grade rug that will beautifully set off your furniture, giving your living room or parlor a rich appearance, make this your choice. Small and large sizes.

Size 27 in. by 52 in. \$ 1.65
Size 36 in. by 63 in. 2.98
Size 9 ft. by 12 ft. 18.95

READER NOTE: We also have a limited number of these rugs in floral medallions, a few all-over effects well covered, and numerous other oriental medallions similar to the pattern illustrated. Almost every conceivable color arrangement is represented in the lot. If the rug illustrated is not just what you wish, give us a description of the pattern and color scheme best suited to your home. We will then select a rug for you which we know will satisfy you entirely. It will be sent entirely at our risk. If you are not pleased with it in every particular, send it back and we will return your money.

You'll Save About HALF on This Beautiful Cabinet If You Buy NOW!

Our Special Low Price
For This 90 Day Sale

\$17⁹⁵

Just Secured From One of
America's Leading Makers

Every woman knows the advantage of "saving steps" in the kitchen. Think of the steps saved and the weariness avoided by having within easy reach mixing bowl, spoon, egg beater, rolling pin, flour sifter, sugar, baking powder, spices, chopping board, meat chopper, extension work table, and all the other conveniences furnished with this kitchen cabinet.

Roll Curtain Front and
Every Improved Feature

You will surely feel a greater pride in your kitchen when you add to it this glass door cabinet. The Venetian art glass in doors and flour bin, and the crystal glass knobs will be highly appreciated, especially at this time when the price of glass is so high. The roll curtain front enables you to get at your spices or sugar without clearing your working top—no old fashioned swinging doors. Swinging sugar bin has a dispenser or cut-off at the bottom. Entire canopy interior has sanitary—easy to keep clean—white enamel lining with corner blocks to prevent lodgment of dust.

The base has sanitary sliding metal top with rounded corners, affording 23½ by 40 inches of clear working space when extended. The large bottom drawer has sides, bottom and top of bin with sliding self-closing cover, excellent for bread and pastry. The sliding shelf in utensil compartment, the rolling pin holder, pan rack and towel rod are all made of heavy tinned steel. The carving or chopping board slides back into the utensil cupboard when not in use.

THE superiority of this cabinet over others is as much in the careful construction as in the conveniences displayed. Built throughout of figured oak, finished a beautiful water-proof golden. Canopy shelf is mortised at ends and will bear any required weight. Corners have dove-tailed top construction and outside corners are rounded. The back of the canopy, the bottom and back of the base and bottoms of drawers are 3-ply built up stock which cannot split or warp. Door panels are all non-warping stock with outside of figured oak.

Cabinets Like This Sell
Usually for \$30.00
